

Cicioni Radiator Inc. has been in business for over a half-century. Founded by Al and Pat Cicioni back in 1957, Cicioni Inc. has built success while others have come and gone. Located in Hazleton, PA, we have customer service representatives in the Tri-State (PA-NY-NJ) area every day of the week. This is the service foundation upon which our business was started, and it remains the same today.

We repair radiators of all sizes (from small automotive to large industrial), charge air coolers, fuel tanks, gas tanks, oil coolers, heat exchangers and basically anything that transfers heat and carries pressure. We work on mild steel, aluminum, copper, brass, plastic and stainless steel. We also offer on site inspection of your heat transfer equipment by one of our trained professionals.

We are primarily a repair shop. We consider ourselves an extension of your service department. If what you are sending is salvageable, then we will fix it. If not, then we will get you the best possible price on a replacement that will meet or exceed OEM standards. That's not just our job, it's our commitment to you.

Our engineering group has been responsible for designing and integrating heating and air conditioning systems for companies such as Grove World Wide, Link Belt, Volvo (Ingersoll-Rand), Blue Bird Body Company and John Deere. Through our alliances with Red Dot Corporation and Mobile Climate Control, we have developed filtration and pressurization systems for construction and mining applications.

The good folks who appreciate our service attitude have supported us during all this time and we are grateful for that. We are professionals and that's the way we treat our customers. They are the ones that keep us on our toes and keep our business thriving.

We are here to assist you and we're ready when you are!
